

LEGAL DOCUMENT

Cookie Policy

Cookies, local storage and external technical resources

Version	17 September 2026
Website	https://amix-team.digital/
Document	COOKIE-2026-09

Important

This document reflects the actual AMIX TEAM website model: informational and educational materials, trading signals and subscription access. AMIX TEAM does not accept or manage users' funds.

1. Purpose of this document

This Cookie and Similar Technology Policy describes the actual technologies found on a verified version of the AMIX TEAM website and how to manage them. It complements the Privacy Policy.

A cookie is a small file that a website can store in a browser. Local Storage is similar to a storage in the browser, but technically it is not a cookie. In the document they are collectively referred to as storage technologies if the difference is not significant.

2. Technologies used on the Website

2.1 Language selection

The localStorage amix-lang key stores the code of the chosen language to display the same language on your next visit.

2.2 Cloudflare protection

The site uses Cloudflare to protect against bots and abuse. Cloudflares may set strictly necessary cookies or other security verification identifiers. Their exact name and duration depend on the protection mode and may vary by provider.

2.3 Technical requests to external resources

The fonts are uploaded from Google Fonts, and the Three.js library via cdnjs. In such a request, the external provider receives at least an IP address and technical connection headings. AMIX TEAM

2.4. External sites

Links to Telegram and Teletype lead to standalone platforms. After the transition, they can use their own cookies and technologies according to their policies. AMIX TEAM does not manage their storage.

3. Categories and legal bases

Strictly necessary technologies ensure the delivery of the page, the protection and stability of the Site. They are used on the basis of the need to provide the requested service and legitimate interest in security.

The functional language setting is used to perform the user's choice. The user can change the language or delete the browser value.

Compulsory analytical or advertising technologies should only be used after information is provided and consent is obtained where it is required.

4. Managing these technologies

The browser can view and delete website data, block cookies entirely or for individual domains, enable automatic deletion and restrict third-party cookies. After cleaning amix-lang, the site will again select the language based on the browser settings or the default language.

Blocking strictly necessary security mechanisms may result in Cloudflare being re-checked or the Site being unable to be accessed. Blocking external resources may change the appearance or animation, but should not eliminate the user's right to opt out of unnecessary tracking.

5. Changes and contact details

The document is updated when analytics, advertising, forms, payment widgets or other technologies are added.
